

Working professionals looking for 3X salary

300+

AI

TOOLS GUIDE

Examples

"Explain quantum computing in simple terms"

"Got any creative ideas for a 10 year old's birthday?"

"How do I make an HTTP request in Javascript?"

Capabilities

Remembers what user said earlier in the conversation

Allows user to provide follow-up corrections

Trained to decline inappropriate requests

Limitations

May occasionally generate incorrect information

May occasionally produce harmful instructions or biased content

Limited knowledge of world and events after 2021

Send a message

Introduction

Introducing the Ultimate "300 AI Tools Guide" eBook! 🤖

Welcome to a world of endless possibilities where artificial intelligence meets innovation! 🌟 In this dynamic digital age, AI tools have become our steadfast companions, empowering us to unlock new frontiers of creativity and efficiency. 🚀

Are you curious about the incredible AI tools that can transform your smartphone into a virtual AI powerhouse? 📱 Look no further! This handbook is your passport to an AI wonderland, featuring a curated collection of 300 remarkable AI tools that you can carry with you, wherever you go. 🌐

Whether you're a tech enthusiast, an entrepreneur, a creative mind, or just someone intrigued by the AI revolution, this guide is designed to be your go-to resource. 🤝 From language translation to image recognition, data analysis to virtual assistants, we've meticulously assembled a diverse array of tools that cater to your every need.

Each tool comes with a snapshot of its capabilities, allowing you to effortlessly navigate through the sea of possibilities.💡 Dive into user-friendly descriptions, direct download links, and insightful tips that will help you harness the true potential of AI in your daily life. 📊🔍

But this isn't just a list – it's an experience. We've woven together the threads of innovation, convenience, and imagination to present you with a digital companion that simplifies the complex and fuels your aspirations. 🧠💡

So, whether you're waiting in line, sipping coffee at your favorite cafe, or simply seeking inspiration, you now have the power to access an AI arsenal that's as versatile as your imagination.🌈 Let's embark on this AI journey together – the "300 AI Tools Guide" awaits your exploration! This is Himanshu agrawal signing off and waiting to receive a selfie with this guide on my instagram ;) 🌎👤📸

Name - Clean Email

Link - <https://clean.email/>

How the Logo Looks like -

Whom does it help?

- Individuals
- Businesses
- Organisations

Description -

Clean Email helps you manage your mailbox overloaded with unread and unwanted emails more efficiently — while keeping your data safe and respecting your privacy. Clean up emails with our email inbox cleaner app.

Save Time, Stay Organized, Reduce Stress and Use it anywhere. Clean Email works on any device and with all email service providers like Yahoo, Gmail, Hotmail, AOL, and your company email account. Use it along with any email app such as Outlook, Apple Mail, Gmail App, and more.

Name - Sunsama

Link - <https://www.sunsama.com/>

How the Logo Looks like -

Whom does it help?

- Remote workers
- Entrepreneurs
- Students
- Anyone who wants to be more productive

Description -

Get more done in less time. Sunsama helps you focus on your most important tasks and timebox them to specific periods of time. This can help you avoid distractions and get more done in a shorter amount of time.

Be more productive. Sunsama's focus on timeboxing can help you be more productive by ensuring that you are working on the right tasks at the right times. This can help you avoid wasting time on less important tasks.

Name - Right Inbox

Link - <https://www.rightinbox.com/>

How the Logo Looks like -

Whom does it help?

- Sales professionals
- Recruiters
- Marketers
- Customer service professionals
- Anyone who uses Gmail for work

Description -

Never worry about follow-ups anymore

Write follow-ups beforehand and schedule to send them if recipients don't reply to your first email. When they do, follow-ups are automatically canceled.

Right Inbox's email sequences feature ensures you never miss a follow-up again. Automate your outreach with email sequences in Gmail.

Name - Coda

Link - <https://coda.io/>

How the Logo Looks like -

Whom does it help?

- Product managers
- Marketing teams
- Sales teams
- Developers
- Students

Description -

Coda is a cloud-based document editor that combines the features of a spreadsheet, presentation document, word processor file, and apps. It allows users to create interactive documents that can be used for a variety of purposes, such as project management, team collaboration, and data analysis.

Coda documents are made up of cells, which can contain text, numbers, formulas, images, and other data. Cells can be linked to each other so that changes in one cell are reflected in others.

Name - Gradio

Link - <https://www.gradio.app/>

How the Logo Looks like -

Whom does it help?

- Educators
- Businesses
- Data scientists
- Machine learning engineers

Description -

Gradio is an open-source Python library that helps you build beautiful, interactive web apps for your machine learning models. With Gradio, you can quickly create a user interface around your model that allows people to try it out by dragging and dropping in their own images, pasting text, recording their own voice, and more. Gradio is useful for

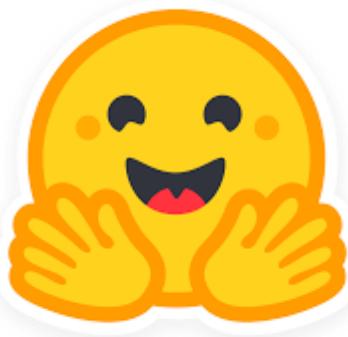

Demoing your machine-learning models for clients/collaborators/users/students.

Sharing your models with the community on GitHub or Hugging Face Spaces.

Name - Hugging Face Hub

Link - <https://huggingface.co/>

How the Logo Looks like -

Whom does it help?

- Software engineers
- Data scientists
- Developers
- Machine learning researchers

Description -

Hugging Face is a company that develops tools for building applications using machine learning.

Hugging Face also offers a number of paid services, such as Compute and Enterprise, that can help developers accelerate their machine learning projects.

Hugging Face is a valuable resource for anyone who wants to learn about or use machine learning. It provides a wide range of resources, including pre-trained models, datasets, and a community of developers, that can help developers get started with machine learning and build more powerful machine learning applications.

Name - WriteSonic

Link - <https://writesonic.com/>

How the Logo Looks like -

Whom does it help?

- Writers
- Marketers
- Students
- Business owners

Description -

Writesonic uses artificial intelligence to generate high-quality content that is SEO-optimized and engaging. It can also be used to paraphrase existing content, making it more concise and readable.

Writesonic can help you create content much faster than you could by hand. This is especially helpful if you are a busy blogger or marketer.

Writesonic uses AI to generate content that is high-quality and engaging. This can help you attract more readers and customers.

SEO-optimized content can help you rank higher in search results. This means that more people will see your content, which can lead to more traffic to your website or blog.

Name - Grammarly

Link - <https://app.grammarly.com/>

How the Logo Looks like -

Whom does it help?

- Students
- Professionals
- Writers
- Educators

Description -

Grammarly is a writing assistant that helps you write clear, error-free text. It can be used to check grammar, spelling, punctuation, style, and clarity. Grammarly also offers suggestions for improving your writing style and tone.

Grammarly works by analyzing your text as you write and highlighting any areas where it can be improved. You can then accept or reject Grammarly's suggestions. Grammarly also provides explanations for its suggestions, so you can learn from them and improve your writing skills over time.

Grammarly is available as a browser extension, a desktop app, and a mobile app.

Name - QuillBot

Link - <https://quillbot.com/>

How the Logo Looks like -

Whom does it help?

- Students
- Writers
- Professionals

Description -

QuillBot is an AI writing tool that helps you write better, faster, and smarter. It has three main features:

Paraphrasing: QuillBot's paraphrasing tool can rewrite your text in a different way, using different words and phrases, while still preserving the original meaning.

Summarizing: QuillBot's summarizing tool can condense a long piece of text into a shorter, more concise summary.

Grammar checking: QuillBot's grammar checker can help you identify and correct grammar and punctuation errors in your writing. This can be helpful for ensuring that your writing is clear and error-free.

<https://github.com/BerriAI/reliableGPT>

How the Logo Looks like -

Whom does it help?

- Developers who are building applications that use the OpenAI GPT-3 API.
- Developers who want to improve the reliability of their applications.
- Developers who want to avoid rate limiting and other errors when making requests to the GPT-3 API.

Description -

ReliableGPT is a powerful tool designed to ensure zero dropped requests for your LLM (Language Model) app in production. It handles errors effectively by employing various strategies such as retrying with alternate models, larger context window models, semantic similarity-based cached responses, and fallback API keys.

Iternate Model Retry: Retry failed requests with alternate models such as GPT-4, GPT3.5, GPT3.5 16k, or text-davinci-003.

Larger Context Window Models: Retry requests with larger context window models to address Context Window Errors.

Command Execution: Obtain helpful information and execute commands seamlessly within the terminal.

Name - Eesel AI

Link - <https://www.eesel.ai/>

How the Logo Looks like -

eesel

Whom does it help?

- Knowledge workers
- Remote workers
- Teams
- Managers

Description -

Eesel AI is like ChatGPT over your company knowledge. Connect your Google Docs, Notion, Confluence, help center, and so on, and get an "oracle" that can instantly answer any question. Add it to Slack or as a website widget.

Ask a question, get an answer: Ask it anything, and it will respond based on the knowledge you "teach" it.

Works with any app: Whether it's Google Docs, Notion or Confluence, you can "teach" it to your Oracle.

Add it to Slack or as a website widget: It can support both internal or external use.

Automatic scraper: Scrape and "teach" your public help centre or API docs to the Oracle with 1 click.

Private by design: Data is stored in a SOC2 compliant app, and never used to train ChatGPT. You don't even need to give API access to your tools.
